Reduce your costs and help the environment

Incentives for multi-storey buildings

The City of Adelaide's incentives for sustainability offer financial incentives that make your building cheaper to run and an even better place to live and work.

Whether you're already taking action or just getting started, the City of Adelaide supports sustainability initiatives that benefit owners, tenants, and the environment.
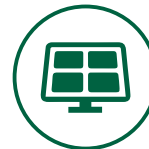

We're committed to working with our community to create a sustainable city now and for the future.

Visit our website for the full range of incentives for sustainability and eligibility criteria.

Smart Energy
Use your energy efficiently with money back on energy smart technologies and appliances.

Green Energy
Save money and create renewable electricity with solar.

Electric Vehicles

CITY OF ADELAIDE

Making good events, great for the environment

Guidelines and incentives for events

Adelaide is one of the world's great festival cities hosting over 800 events every year. Events play an important role in the local economy and creating a city that's designed for life. Many events are held on the green community squares in the city and in the surrounding Park Lands, and there is growing desire in the community to make events more sustainable.

We're committed to working with our community to create a sustainable city now and for the future.

We have created a kit of sustainability resources to assist events, big and small, to make a positive change and offer incentives to measure your impact and to certify your event carbon neutral status with the government backed Climate Active program.

Visit our website for the full range of incentives for sustainability and eligibility criteria.
