Capital Works

To ensure we provide assets, facilities and programs that meet the needs and expectations of our community, we undertake ongoing planning, delivery and monitoring of our existing assets. We regularly seek external funding, partnership and grant opportunities to further enhance or bring forward planned works. To ensure existing assets are maintained, renewed and upgraded, and that we identify appropriate opportunities for new assets, Capital Projects are assessed and prioritised with asset sustainability and the organisation's capacity to deliver in mind. Whilst capital projects can be funded by borrowings, we consider the asset depreciation, cost of the life of the asset (through Council's Long Term Financial Plan) and responsible borrowing capacity. Council categorises our Capital Projects expenditure to provide a better understanding of what is being delivered as:

Major Projects, New and Significant Upgrades: Strategically planned, assessed, prioritised and considered in context of new assets or impact to current assets.

Renewals: Renewals and maintenance works which are aligned to Asset Management Plans and current assets.
