HISTORY AND DESCRIPTION:

This house is an excellent example of an 1880s symmetrically fronted sandstone residence. It retains important stylistic elements including rendered quoins and facings to windows and doors, and verandah with paired posts and eaves brackets. It also retains a masonry and iron fence characteristic of this house style.

Town Acre 888 was not subdivided at the time of the Smith Survey in 1880 but was subsequently developed during the decade following with seven houses of similar scale and design. This house remains an important indication of the type of residences constructed at that time, and the use of South Australian sandstone as a building material.
