### HISTORY AND DESCRIPTION:

This pair of houses is an excellent example of a semi-detached 1870s-1880s symmetrically fronted sandstone residence. It retains important stylistic elements including rendered quoins and facings to windows and doors. It is one of a set of four sandstone pairs constructed in Beviss Street.

The outline of the four pairs of houses is visible on the Smith Survey of 1880, when Beviss Street only cut through the centre of Town Acre 872. The street was subsequently extended through to Tynte Street during the decade following. This house remains an important indication of the type of residences constructed at that time, and the use of South Australian sandstone as a building material.
